

Ecological Consulting
Na Střelnici 48
Olomouc 779 00
Czech republic

Date : 9th July 2009

Ecological Consulting, with its seat in Olomouc, performed the activity of the Occupational Health and Safety Coordinator during the preparation and the realisation of the construction of a production plant of the company DYMOS Czech Republic in the industrial zone of Nošovice, realised by our company. The investment costs of this construction exceeded 12.870.000 CZK.

The experts of this company performed their activities responsibly, paying maximum attention to the improvement of the occupational safety during realisation of the construction. Within their special tasks, they responsibly represented the investor of this construction. The construction of the plant of Dymos Czech Republic was realised under impaired conditions, in particular due to the construction of car factory and its subcontractors in its vicinity. I can fully recommend the cooperation with the Occupational Health and Safety Coordinators to other investors caring for good-quality performance of this activity at their constructions.
